

G2FInsight™ - Grant to Fund

- End-to-end solution for Grant Management/Administration built to support any size government agency or department
- Accelerates the entire workflow around grants - as required to maximize your agency's ability to bring federal and other funds into your local jurisdiction
- Combines document process automation™ from City Innovate with the power of ServiceNow's purpose-built Public Sector Digital Services data model paired with digital portfolio management modules.

City Innovate and ServiceNow are proud to partner together to drive greater insight and accountability around the entire grant-to-fund process. With special attention to post-grant management.

From preparing the grant application, to evaluating submissions from local government agencies and NGOs, to managing the grantee for proof of performance, compliance, to oversight and accountability over how funds are being spent by grantees.

The largest government agencies depend on City Innovate x ServiceNow to streamline, modernize, and accelerate their workflows, with enterprise-class SaaS solutions purpose-built for government.

City Innovate's approach to Grant to Fund starts with the insight that documents are the sticking point in the process; automate the production of documents to accelerate the end-to-end process by 50-70%.

The screenshot displays the ServiceNow G2FInsight interface for a grant workspace. At the top, there's a navigation bar with 'servicenow' and 'Grant Workspace'. Below that, a search bar and a list of tabs are visible. The main content area shows the 'Adolescent Family Life Program (AFLP) RFA' workspace. A progress bar indicates the current stage is 'In Progress'. Below the progress bar, there are sections for 'Program', 'Details', and 'Attachments'. The 'Program' section shows the program name and details. The 'Details' section includes fields for 'Purchase Date', 'Public Agency', 'Grant Type', 'Program Category', 'Grant Contributions', 'Program Support Representative', and 'Agency'. The 'Attachments' section shows a list of documents, including 'AFLP-RFA-20-10014.pdf'.

City Innovate provides the platform for Document Process Automation (DPA)

- Replaces desktop applications with modern, cloud-based solutions that include collaboration and project management tools, to eliminate redundant data entry and ensure compliance with funding requirements.
- Documents produced on City Innovate's platform have built-in intelligence. Automates process workflows by turning the unstructured data hidden in large document sets into actionable data for greater insight and accountability. Data can then be injected into multiple systems within the government agency including ERP systems.
- Expert in modernizing how large government agencies administrate and manage grant dollars. Manages grants post award.
- Provides one enterprise-class solution suitable for all sorts of grants and the governments that play a role in them—federal, state, and local.

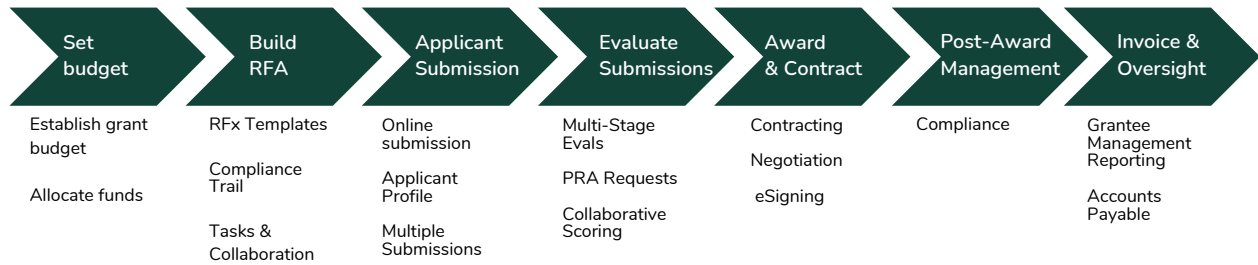

Speed + the accountability and rigorous oversight taxpayer's expect.

G2FInsight™ - Grants to Fund - powered by ServiceNow

ServiceNow is the global leader in enterprise service management with years of experience in scaling solutions for sourcing and vendor management; experience that it now extends when connecting the grant-to-fund process end-to-end. The ultimate goal of ServiceNow's solutions is to modernize processes in a way that is transformative for the enterprise, saving both time and money.

Since 2014, City Innovate has provided the people, processes, and technology needed to modernize the workflows around government procurement/contracting, grants, and budgeting. Our expertise is in Document Process Automation ... turning the data hidden inside documents into structured data for greater insight and accountability; thanks to ServiceNow that data can then be injected into the other systems that government agencies depend on for operations

Document Process Automation applied to Grant-to-Fund process

The benefits of our joint solution include:
